

SOLUTION BRIEF

Manage Beyond the Endpoint

Cyber Defense and Response Collaboration with Hive-IQ

HIGHLIGHTS

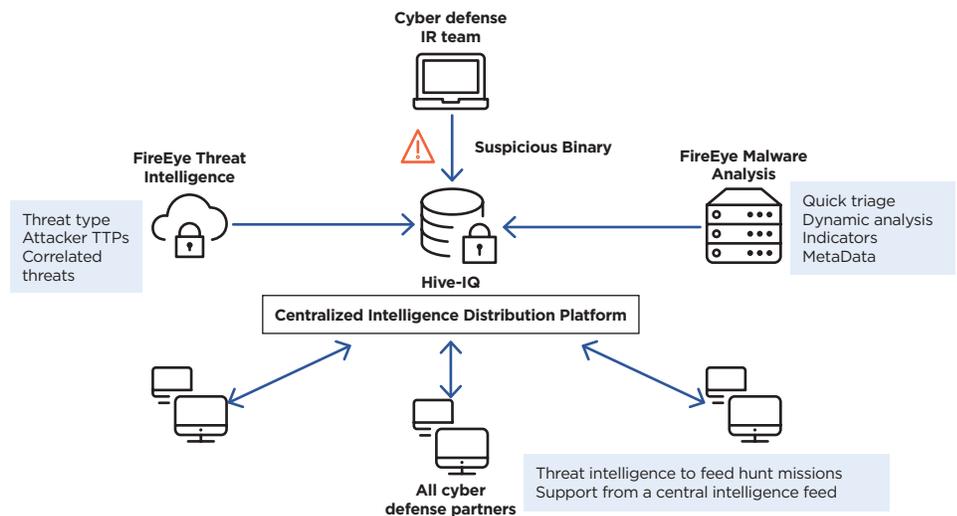

- **Hardened Security Posture**
Seamless compliance integration brings the whole team together making it harder for the bad guys.
- **Faster Decision Making**
Cyber security requires decisions to move at the speed of need reducing gaps in your secure enterprise.
- **Intelligent Analytics Support**
Multi-vector virtual execution engine for analysis of potentially malicious binaries found during critical missions.
- **Endpoint Tool Integrations**
Integrate beyond expensive endpoints and create a situational awareness picture of a more secure enterprise.
- **Team Collaboration**
Knowledge management, complete mission situational awareness, and smarter collaboration makes sense.

With continued ransomware threats targeting state and local agencies for federal government records, cyber attacks pose a serious threat to our communities and national security.

Cyber teams comprised of personnel from National Guard units, fusion centers, law enforcement, state departments and agencies, and critical infrastructure play an increasingly significant role in protecting networks and citizen data from cyber attacks.

Overview

TeamWorx Security's Hive-IQ, powered by FireEye, connects threat analysts to all technical and non-technical teams during the entire response effort, simplifies complex tasks by turning repetitive tasks into repeatable, automated processes and keeps decision makers and the entire organization informed and aligned.

This solution includes deep learning capabilities which can be easily integrated with Mandiant Threat Intelligence to provide enhanced knowledge that enables missions with large, disparate datasets, while adding context, understanding, and decision support to even the most non-technical analytic and operational teams.

How Hive-IQ is Different

Unlike traditional threat analysis platforms and other general-purpose IT tools, Hive-IQ is fully configurable and purpose-built for global enterprise missions. Powerful analytics help create efficiencies through automation, intuitive visualization and overall threat management. Comprehensive data, customizable dashboards and robust reporting features ensure senior leadership can access key information when they need it.

What separates Hive-IQ from other platforms is our focus on the decision making ecosystem which can be directly integrated into fighting bad guys. Our seamlessly integrated platform keeps the whole team, your tools and your enterprise working together.

The TeamWorx Security Advantage:

- Proven by national research and development
- Past performance across cyber, intelligence, healthcare, training and business systems
- Successful track record supporting civilian federal, defense and intelligence community clients
- Certified SBA 8(a) and service-disabled veteran-owned small business (SDVOSB)
- HHS IDIQ: Intelligent Automation and Artificial Intelligence

Threat Analysis Training

Realistic training includes a fully integrated environment tailored to your organization's needs. Our work with the DoD and the National Guard cyber mission is continually updated with insights from US military and intelligence community best practices. Training is offered commercially and for the federal government virtually, onsite and at public locations.

- Integrated Threat Analysis Course (ITAC) prepares the multi-disciplined intelligence analyst as defined by the Department of Defense and private industry, to understand, operate and contribute successfully in the cyber defense, offense and support missions.
- Five-day, highly structured, hands-on classes prepare the analyst for mission demands such as delivering essential information to the decision-maker. Formerly introduced in the Cyber Shield, Cyber Guard, and Cyber Flag exercises.
- Full suite of cyber security and cyber threat intelligence training available from the world-renowned Mandiant Solutions can be found in the FireEye Training Courses catalog.

About FireEye, Inc.

FireEye is the intelligence-led security company. Working as a seamless, scalable extension of customer security operations, FireEye offers a single platform that blends innovative security technologies, nation-state grade threat intelligence, and world-renowned Mandiant® consulting. With this approach, FireEye eliminates the complexity and burden of cyber security for organizations struggling to prepare for, prevent and respond to cyber attacks.
